BIS Consulting Services

We offer one-stop software services that covers the full development and implementation cycles of your IT project including a full range of consulting services:

- IT Systems and Applications Strategy Development
- Software Architecture Planning
- Consulting on Application and Software Development
- Project Requirements Definition and Design
- Choice of Technology / Framework
- Business Process Analysis and Formalization

With a 16-year company experience in software development, implementation, quality assurance and software support BIS advisory services are characterized by deep understanding of all business and functional requirements as well as ambiguous nuances of business workflows. Thus, the combination of technology expertise and automation strategy knowledge base empowers BIS to provide customers with the first-class services, which ensure improved business efficiency, increased cost-effectiveness, and risk minimization.

BIS's Service & Technology Business offers Implementation, Maintenance, Development, Upgrades and Integration services for ERP, CRM and Supply Chain Applications including SAP, Oracle, JDE, PeopleSoft, and Siebel,

Offshore Development & Services

Few SAP clients believe that they require unique and custom solutions. Integrating systems with applications assumes importance once the initial SAP goals are realized. Familiarity by the SAP users with the application paves the search for ways to use the application better and to become more effective. Years long SAP experiences allow us to serve our clients conceptually and offer an extensive "knowledge base".

The robust and up-to-date infrastructure available at our offshore development center/factory at " VLE Integrated Solutions (p) Ltd, " - Hyderabad , India, provides support and timely completion of projects. Professionals at BIS and VLE use their expertise and skill in SAP all modules like MM, SD, FICO , QM, PS, special products for planning like APO-Dp, SNP, PPDS, GATP, BW, SEM, CRM, and ABAP-SMART forms, LSMW, and BSP application to provide the best and the latest ABAP development services, Highly skilled personnel with multiple-technology expertise enable execution of complex technology architectures and SAP R/3 experienced personnel.

BIS have the resources to provide your company or team with:

- 🔗 project/Engagement Managers
- 🔗 Business System Analysts
- 🔗 Functional Consultants
- 🔗 Technical Consultants
- 🔗 System Administrators

Total customization with SAP ERP

With SAP ERP, you'll cover all the standard functions a mid-sized company could ever need. We'll help you pinpoint and implement the functions that are relevant to your business. That way, you can rest assured that you're only getting the solutions you actually need. Of course, if you want to expand in the future, or if your software requirements increase, we'll also be there to help upgrade and adapt your system to meet these new demands.

Tailored for your industry

If you need a solution that'll cover your entire value chain and that can be implemented and operated transparently and quickly, within sensible cost parameters, then BIS has just what you are looking for. By pre-configuring your industry solution, we can set up the majority of your processes in advance as part of a complete solution. As well as saving you time and money, this also gives you a good idea of what your solution will look like, or should look like, at the very start of the project.

Our Approach to SAP Solutions:

BIS understands the importance of Business Continuity within the enterprise. By emphasizing best practices during all phases of the implementation life cycle, we are able to enhance the success and timely delivery of our SAP projects. This is the BIS Advantage. Adding value to our client is part of the focus of BIS. We pay attention to details by tracking, maintaining and optimizing your SAP investment. With our Tested planning skills and quality implementations we ensure that on-going maintenance, upgrades, application hosting, and managed services are successful and on time.

Our Value Proposition:

- Lowering the Total Cost of ownership by using effective implementation practices and methods.
- Talented pool of SAP certified Functional and Technical consultants delivering solutions on quality
- Global delivery model helping in delivery of cost effective solutions on budget and on time
- Complete Best Practices database with templates and tools to speed up your implementation project
- On-site, Near-shore and Off-shore development capabilities
- Products to enhance, expedite or compliment the SAP Applications
- We can collaborate with your business and IT teams to guarantee smooth system transitions
- BIS SAP practice has a proven track record in implementation at leading Global 1000 Companies.

We bring to the table the complete spectrum of service offering that ranges from global implementation, global rollout, application development maintenance and support, integration, upgrades, testing, migration to SAP and business transformation.
